EMPLOYEE LOCKER LOCKS

DIGILOCK EMPLOYEE LOCKER LOCKS MAKE MANAGEMENT OF EMPLOYEE LOCKERS A BREEZE

DIGILOCK'S EMPLOYEE LOCKER LOCK PRODUCT LINE HAS BEEN SPECIFICALLY DESIGNED FOR EMPLOYEE LOCKERS WHERE THE LOCKERS ARE SHARED BY MULTIPLE USERS. HAVING THE ABILITY TO SHARE LOCKERS BETWEEN SHIFTS REDUCES THE NUMBER OF REQUIRED LOCKERS AND THEREFORE, REDUCES THE REAL ESTATE REQUIRED FOR THE LOCKER ROOM.

DIGILOCK MINIMIZES THE AMOUNT OF MANAGEMENT TIME REQUIRED TO MANAGE THE LOCKER ROOM AS THERE ARE NO KEYS TO MANAGE. WITH DIGILOCK, ASSIGNING LOCKERS AND/OR HAVING EMPLOYEES PROVIDE THEIR OWN LOCK IS ELIMINATED.

HOW IT WORKS

Digilock employee locker locks allow employees to lock their belongings in any available locker with use of a self selected four-digit code. Management access to the locks is provided with the use of an electronic manager bypass key which does not disturb the user code.

In order to prevent employees from assigning a locker to themselves, lockers that are locked and abandoned will automatically become available after 12 hours of non-operation.

Employees with disabilities can use the ADA User Key instead of a four-digit code. Simply touch the ADA User Key to the key slot of any available locker and it will replace the function of the code.

KEY BENEFITS

LOSS PREVENTION

Management can easily audit the lockers by using the manager bypass key. This feature provides a quick way to monitor employee lockers and recover missing store inventory.

SHARED USE

Allows lockers to be shared between shifts which reduces the number of lockers required in the locker room and therefore reduces the required real-estate. Lockers will automatically unlock after 12 hours of non-operation to prevent employees from use of the locker after their shift.

ROI

With a battery life of five years or more, Digilock is a low cost solution that quickly pays for itself within the first few months of implementation. It eliminates lost keys, unavailable lockers, and bolt cutters, but most importantly, the waste of managements time.

ADA COMPLIANT

Digilock meets the US Access Board's requirements for ADA compliance with the use of the ADA User Key. Employees with disabilities are issued an ADA User Key that will allow access to any available locker requiring without tight grasping, tight pinching or twisting of the wrist.

EMPLOYEE THEFT

Deters employee theft as lockers can be audited at any time without disturbing the user code.

EASY TO INSTALL

Digilock is easy to install on new or existing lockers.

DURABLE

Digilock is a time-tested product with installations in thousands of retail establishments.
